

Flexible Flex Range for use with all MHG Condensing Boilers.

- The flexible flue systems from 80mm to 160mm are available for use with our gas and oil condensing boilers.
- Available in a selection of lengths from 10 meters to 50 meters.
- Transition sections from rigid to flex complete with integral riser support.
- Centralising brackets to ensure correct routing within the existing shaft.
- A choice of terminals for conventional or balanced flue operation.
- Removes the requirement for access hatches due to one piece construction.
- Works in harmony with our range of rigid concentric and PPS flue systems.
